Pune, Maharashtra | +91-8319571992 | aaryankumar1435@gmail.com | LinkedIn | GitHub | CodeChef

Education

Indian Institute of Information Technology, Pune

Pune, Maharashtra

B.Tech in Computer Science and Engineering; CGPA: 7.56

2024 – 2028

Technical Skills

Languages: C++

Core CS Subjects: OOPs, DBMS, Operating Systems, Computer Networks, Compiler Design

Web & Backend Tech: React, Node.js, Express.js, MongoDB, SQLite, Cloudinary, REST APIs

Testing & Tools: Postman (API testing), Git, GitHub Actions, VS Code

ML/AI (Secondary): HuggingFace Transformers, Gemini API, Claude API, Prompt Engineering, RAG, NLP, LangChain

Projects

ShopEase – Fullstack E-Commerce Application | *React, Redux, Tailwind CSS, Spring Boot, PostgreSQL* | GitHub

- Developed a fullstack e-commerce application with product browsing, category filtering, cart management, and a checkout flow, backed by REST APIs built with Spring Boot and Spring Data JPA.
- Implemented JWT-based authentication and role-based authorization with Spring Security, modeled product-user-order relationships in PostgreSQL, and documented the API surface with a Postman collection.

AcadeX – College Lecture Video Platform | *React, Material UI, Nodejs, Expressjs, MongoDB, Cloudinary* | GitHub

- Built a role-based lecture library serving students, faculty, and admins, with REST APIs for a subject → semester → topic → lecture hierarchy and year-scoped content access.
- Designed 7 MongoDB collections including a teaching-assignment model that maps faculty to subjects per academic year, and implemented Cloudinary-backed video delivery with multi-resolution playback and threaded student-faculty Q&A.

Multimodal RAG Pipeline | *Python, LangChain, LangGraph, PostgreSQL, pgvector*

- Built a multi-source retrieval-augmented generation pipeline ingesting PDFs, web pages, and GitHub repositories into a unified embedding space backed by Postgres with pgvector.
- Orchestrated query routing and multi-step retrieval with LangGraph, using source-aware chunking and re-ranking to improve answer grounding and reduce hallucinated responses.

Entrepreneurship

Veridion – Founding Team, Backend & API Security | *Early-Stage Fintech* | veridion.co.in

- Part of the founding team of an early-stage fintech product in active development; contributing to the backend architecture using TypeScript/Express, Prisma ORM, and PostgreSQL.
- Working on the API security layer – implementing authentication flows, OAuth integration, and endpoint-level access controls across the service.

Open Source Contribution

GirlScript Summer of Code (GSSoC) 2026

Open Source Contributor

- Raised 5+ pull requests fixing bugs and shipping feature enhancements across production-grade repositories under GSSoC and NSoC 2026.
- Collaborated with maintainers through structured code reviews, improving issue-triage accuracy and adhering to project-specific contribution guidelines.

Nexus Spring of Code 2026

Open Source Contributor

- Delivered end-to-end feature implementations and resolved critical issues in large codebases under mentorship.

Achievements

JEE Main: 98.89 percentile | **JEE Advanced:** AIR 16085

Selected for Second Round, **Meta PyTorch OpenEnv Hackathon**, Scaler School of Technology, Bangalore (2026)
